Karachi, Pakistan
linkedin.com/in/muhammad-ebad-hafeez

EDUCATION

Bachelor of Computing & IT (BCIT)

NED University of Engineering and Technology
Karachi, Pakistan · Expected Graduation: 2027

Specialization: Gaming & Animation · 3rd Year

SKILLS & TOOLS

REACT · NEXT.JS · NODE.JS · JAVASCRIPT · POSTGRESQL · SUPABASE · PHP / LARAVEL · UNITY 3D / 2D · UNITY AR / VR · UNREAL ENGINE · BLUEPRINT SCRIPTING · LEVEL DESIGN · ENVIRONMENT ART · GAME UI DEV · META QUEST 3 / XR · BLENDER (BASIC) · CANVA

PROJECTS

RFQ-TO-INVOICE SAAS · AVIATION PARTS TRADING

NEXT.JS · SUPABASE · MULTI-TENANT

Launched a multi-tenant SaaS that automates the RFQ-to-invoice workflow for aviation parts trading companies. Now in pilot with early customers.

Role (Solo): Designed, built and shipped the full stack

LUDO MOBILE GAME BACKEND

NODE.JS · POSTGRESQL · UNITY

Backend for a Ludo mobile game, built in Node.js with PostgreSQL and connected to the Unity game client.

Role: Backend development · Unity-to-Node.js integration

TINY VILLAGE

UNREAL ENGINE · SURVIVAL HORROR

Single-player survival horror game inspired by Dead by Daylight. The player activates enemy-guarded generators across an abandoned village to unlock a hidden escape route.

Role (Team of 3): Full game environment · Generator & gate logic · UI systems · Contribution to combat system

UNDERWATER VR EXPERIENCE

META QUEST 3 · UNITY VR

Immersive VR ocean exploration deployed on Meta Quest 3. Players explore an underwater world from a submarine with full locomotion and gesture-based swimming controls.

Role (Team of 4): Full ocean exterior environment design & implementation

TWO LIGHTS ONE ESCAPE

UNITY 3D · LOCAL CO-OP

3D split-reality co-op puzzle platformer for two local players, who coordinate across mirrored rooms to escape together.

Role (Team of 3): Level design for 2 levels · Environment art across majority of all levels
